DETAILED ACTION

Claim Objections

1. Claim 4 is objected to because of the following informalities: In the first line of claim 4:
The term "is" should be changed to --in--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 2-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ferguson '419. Ferguson '419 is considered to show the *structural* limitations of a device (10) comprising a wedge-shaped head piece (14) and a plurality of other elements (12, 24, 30) deployable on a sleep surface, said plurality of other elements including a wedge-shaped torso piece (12) (see Figures 1-3 and column 3, lines 20-47); furthermore, the claimed recitations regarding the positioning of a person relative to the device (such as those recited in claims 4 and 7) are considered to be method steps which do not have patentable weight in apparatus claims.
4. Claims 2-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Burpo '140. Burpo '140 is considered to show the *structural* limitations of a device (10) comprising a wedge-shaped head piece (11) and a plurality of other elements (11a, 24, 25) deployable on a sleep

Art Unit: 3673

surface, said plurality of other elements including a wedge-shaped torso piece (11a), wherein the respective thicknesses of the head and torso piece increase in opposite transverse directions (as shown in Figures 1-3), and each of the head and torso pieces comprises a block (13, 13a) of hard, non-yielding material (as described in column 2, lines 4-6) , a cover of thin soft material (21, 21a) fitted tightly over the block (as shown in Figure 3), and a soft and compressible pillow (23, 23a) enveloping both the block and cover (also as shown in Figure 3).

Response to Amendment

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Saro et al. '790, Krouskop '323, Alivizatos '828 and Willey '306.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3673

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
